## **The ENIC Network - European Network of Information Centre**

The Council of Europe and UNESCO have established the ENIC network in order to develop policy and practice for the recognition of qualifications.

The Network is made up of the national information centres of the States party to the European Cultural Convention or the UNESCO Europe Region. An ENIC is a body set up by the national authority. While the size and specific competence of ENIC may vary, they will generally provide information on:

- the recognition of foreign diplomas, degrees and other qualifications;
- education systems in both foreign countries and the ENIC'S own country.

The ENIC network cooperates closely with the NARIC network of the European Union.

## **The NARIC Network – National Academic Recognition Information Centre**

The NARIC network is an initiative of the European Commission and was created in 1984. The network aims at improving recognition of diplomas and periods of study in the Member States of the EU, the EEA and Accession countries.
